XM is the first truly new broadcast service in many years and as such deserves support, not attack. As a long distance traveler, I find the benefits of XM innumerable and would be lost without it. I still use local broadcast stations for a variety of listening as I travel but go to XM for talk, music, news and more. The best of all broadcast worlds continues to be AM/FM/XM. Do not stifle innovation again or create similar debacles to the Local/Long Distance Tariff muddled protectionist environment. Reject Petition 04-160 without delay.
